

Unlock Precision Material Delivery with the CTS Pack Mule Cross Gate

See why contractors, municipalities, & government agencies trust the CTS Cross Gate for all their road construction & small aggregate projects.

Built for performance, designed for precision. Discover how this trailer revolutionizes controlled material flow and boosts your productivity.

What Makes It Different?

Cross Gate Design

Side-to-side gate positioning provides a tight seal and a wider unloading path than traditional front-to-back belly dump gates.

Controlled Flow

The adjustable gate opening ensures even, controlled material placement for aggregate, sand, or paving applications.

Built for Tough Conditions

Heavy-Duty Construction

Engineered to endure the toughest jobsite conditions.

Faster Dumping Cycles

Boost productivity with rapid unloading capabilities.

Versatile Configuration Options

Many Available Options

Whether you are doing road construction, mining, dirt moving, or many other projects. Choose the configuration that matches your hauling needs.

Suspension Options

Available with air-ride or spring suspension systems. Multi-axle & lift axle configurations available.

Customizable Features

Control Systems

Optional Infinite gate control systems for precision operation. Cab kits available for gate & tarp operation from inside the truck.

Protection Options

Slope sheets, aluminum or steel fenders, and customizable tarp options.

Performance Advantages

Smoother Flow Control

If you need precise thicknesses, detailed patterns, or a wider dumping path, the crossgate design allows material to lay down the width of the trailer.

Reduced Material Bridging

Better material discharge means fewer delays and operational issues.

Exclusive Dealer Benefits

30-Mile Radius Protection

Exclusive territory rights for authorized dealers.

Dedicated Support

Parts, service backup, and co-branded marketing programs.
