

Built to Last, Designed to Perform: Meet the CTS Pack Mule Bottom Dump Trailer

The trailer that outworks the competition

Discover why professionals choose CTS for trailers that make work easier, safer, and more profitable.

Engineered for Real-World World Performance

1

Reinforced Frame Design

Heavier frame rails and crossmembers increase durability while providing just the right amount of flex.

2

Heavy-Duty Gate System

Air-operated gates with robust linkages ensure smoother operation and tighter sealing.

3

Superior Ground Clearance

Raised gate positioning protects components in rough terrain and on uneven surfaces.

Built Strong, Built Smart

1 Lightweight Design

14GA corrugated sides deliver lighter tare weight (12,200 lbs.) without sacrificing durability.

2 Enhanced Suspension System

Purpose-built design provides superior load stability and reduces component wear.

3 Corrosion-Resistant Finish

Multi-stage, industrial-grade paint protection against rust extends trailer lifespan.

The Competition Can't Compare

CTS Advantage

Steel where it matters with optimal flex for durability.

CTS Superiority

Many competitors use thicker, more rigid materials to save weight. This can lead to early cracking and failure.

Thoughtful Details That Matter

1

Custom Fit For Your Haul

Tailored to your job with customizable axle spreads & gate sizes. Many other options available to suit your needs.

2

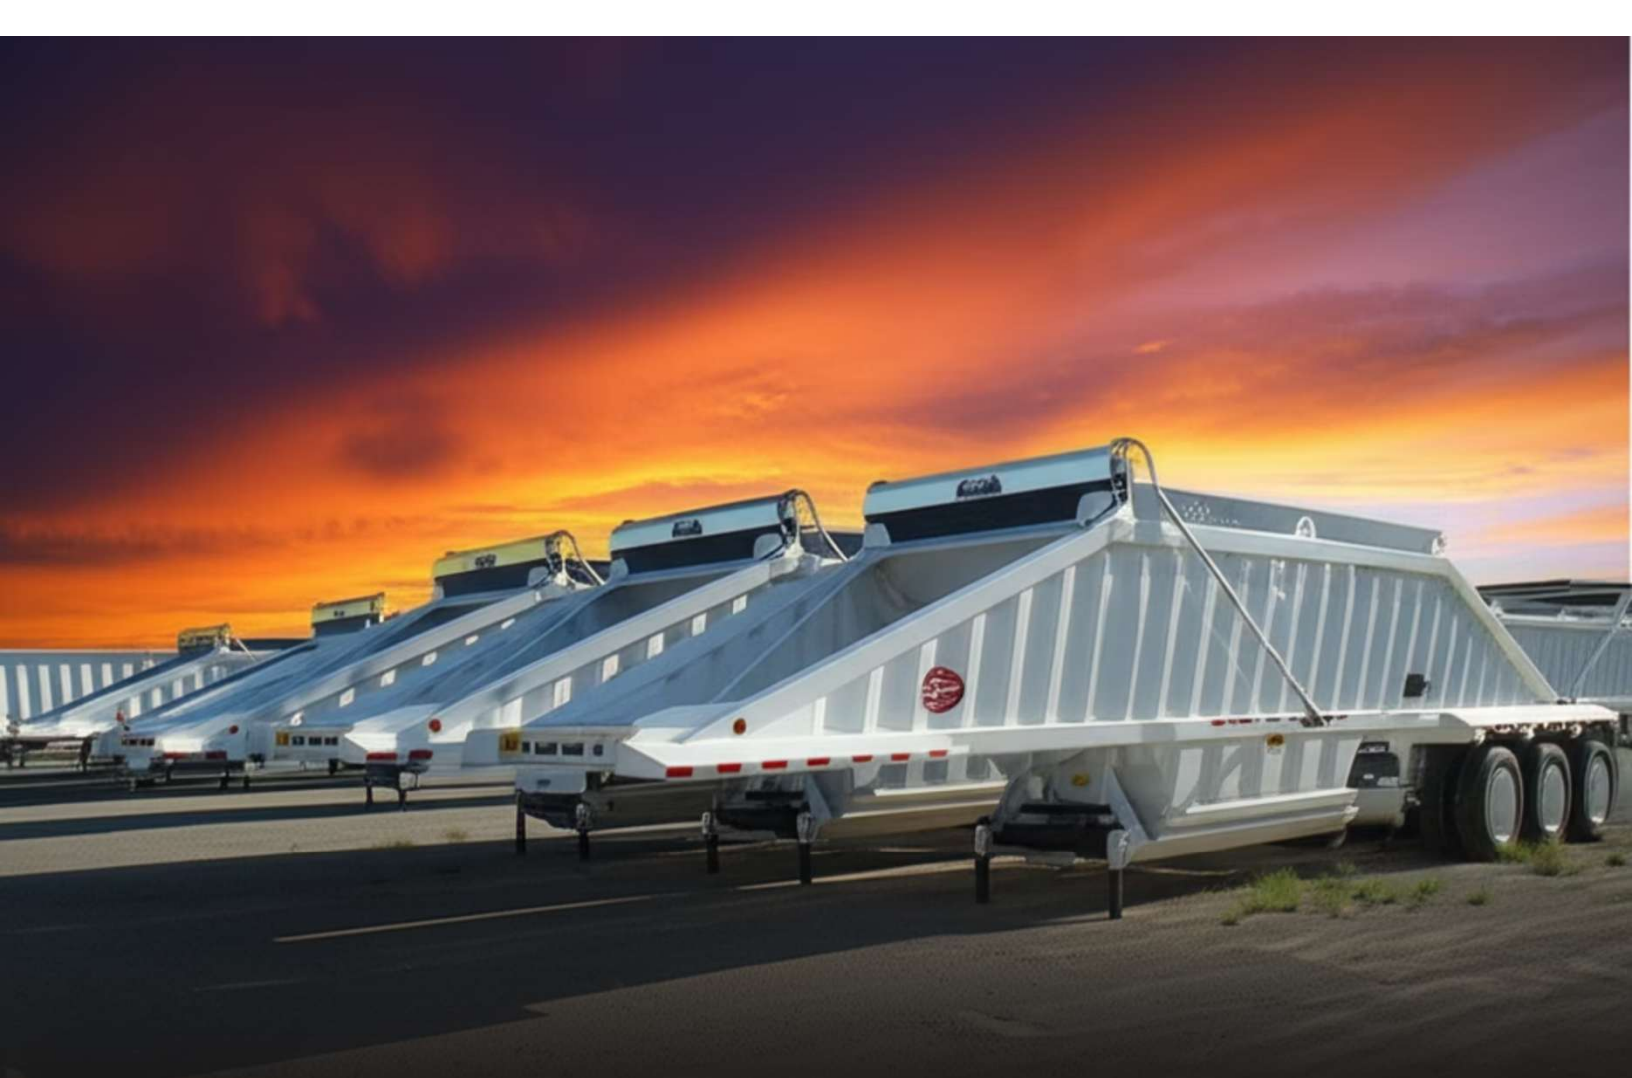

Higher Resale Value

CTS trailers typically hold their value better than the competition.

3

Brand Reputation

Often imitated, never duplicated. Our name stands for quality.

Made in America, Built for America

Proudly built in the USA and backed by decades of industry experience with a nationwide dealer network.

The Bottom Line on Bottom Dumps

Durability

Engineered to withstand the toughest conditions year after year.

Performance

Optimized design that makes your job easier and more efficient.

Value

Higher quality means lower lifetime costs, higher resale value, and better ROI.
