The **BEST** Roll Tarp on the market is the Roll Master threadless roll tarp.

NO THREAD-NO GLUE AND GAURANTEED WELDS.

No thread to rot, & weaken the tarp, & leak through all the needle holes. Best Tarps uses the highest quality vinyl and on standard width roll tarps for 96 OR 102 wide trailers, uses 1 piece material so there are no panels welded together.

This makes for the smoothest rolling – **BEST** quality tarp on the market!

YOU HAVE HAD A MANUAL ROLL SYSTEM.....IT IS **TIME TO EVOLVE**

The **Roll Master Evolution Electric System** features our powerful Roll Master HD motor attached to our gear reduction system, insuring your tarp is tight and secure at all times with the exact torque needed for load protection and containment. This powerful system is designed to walk over heaped loads with ease.

The Evolution offers heavy duty aluminum arms backed by a lifetime warranty against breaking.

The Evolution can be fitted to most trailers in the industry. This system can be used to convert your manual crank system to one that opens and closes your tarp by the simple push of a button from the comfort of your truck, or by the optional remote control.

BEST  TARPS

besttarps.com

Built with Revolutionary Double Core

STRENGTH AND FLEXIBILITY

G) BOW-NB

NYLABOW BOW ONLY

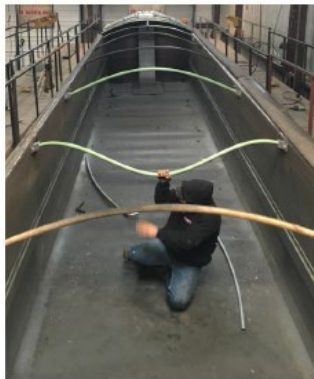

H) BOW-NB2

NYLABOW ALUMINUM HOLDER ONLY

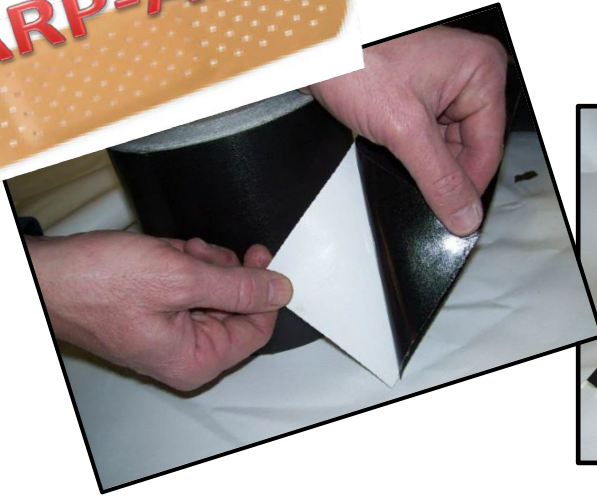

NYLABOWS

Designed to withstand temperatures up to 205° and down to -10°. The solid bow inside the outer bow provides a flex and slide that enables strength and flexibility. The outer bow protects the inner bow from absorbing water and provides UV protection so the nylon center does not get hard

**BEND AND FLEX
BUT DO NOT BREAK!
UV PROTECTED!**

Do not use ridge poles or ridge straps with UnbreakaBOWs

- Part # Patch6-roll 6"x50' roll 18 oz repair tape
- Part # Patch6-case Case of 6 - 6" x 50' rolls

FTBAP16 16'ARM

NEW PATENTED ELECTROMAGNETIC LOCKING DEVICE FOR FRONT TO BACK TARP SYSTEMS, **THE TARP MAG™** USES TWO 300 LB ELECTRO MAGNETS TO HOLD DOWN ALUMINUM OR STEEL ARMS TO PREVENT COSTLY DAMAGE TO FRONT TO BACK SYSTEMS. USING STEEL CONTACT PLATES ATTACHED TO EXTENSION ARMS AND A MULTI FUNCTIONAL ROCKER SWITCH, WHEN THE TARP IS IN THE CLOSED POSITION, THE ELECTROMAGNETS USE 300 LBS OF PRESSURE PER SIDE TO KEEP THE ARMS SECURELY LOCKED IN PLACE. WHILE TRAVELING DOWN THE ROAD OR IN WINDY CONDITIONS, THE TARP MAG SYSTEM PREVENTS VERY COMMON AND EXPENSIVE DAMAGE TO THE ARM SETUP ON FRONT TO BACK TARP SYSTEMS AND CAN BE RETRO FITTED TO MOST SYTEMS ON THE MARKET. WITH THE 4 PRONG PLUG SET AND MULTI FUNCTIONAL SWITCH, EVERYTHING WORKS SEAMLESSLY WITH THE TARP SYSTEM, ELIMINATING ADDITIONAL STEPS TO OPERATE. **THIS PATENTED TECHNOLOGY IT TRULY MAG-NIFICENT!**

COMPLETE TARP MAG™ SYSTEM

Part # TARPMAG

System includes 14g dual strand switch wire, solenoid, 50 amp breaker, 4 prong male & female trailer plug, multi function rocker switch kit with kill switch that operates both the tarp system and the Tarp Mag™, two extension arm contact plate assemblies, and to 300 lb electromagnetic Tarp Mag assemblies.

- A. # **TM-O** Tarp Mag Only
- B. # **TM-B** Tarp Mag Bracket
- C. # **TM-A** Tarp Mag Bracket Assembly
- D. # **TM-CP** Contact Plate Assembly
- E. # **TM-S** Multi function Switch Only
- F. # **TM-SK** Tarp Mag Complete Switch Kit
- G. # **TM-TPS** 4 PRONG Trailer Plug Set
- H. # **TM-W** 14 Gauge dual strand wire
- I. # **FTB-ES** Solenoid
- J. # **FTB-EB** 50 AMP BREAKER
